

Jasper Valk

AI Engineer | Data Scientist

Amsterdam, Netherlands | +31 6 3734 1180 | jaspermvalk@gmail.com | jaspervalk.github.io | [LinkedIn](#)

Profile

AI Engineer and Data Scientist with a BSc in Artificial Intelligence and experience building applied AI solutions across healthcare, consulting, and analytics settings. Strong foundation in machine learning, data analysis, and Python-based automation, with hands-on work in LLM applications, predictive modeling, and AI product development. Focused on translating complex data and modeling problems into practical, reliable solutions.

Technical Skills

Programming	Python, SQL, Java
AI & Machine Learning	Machine learning, data analysis, predictive modeling, model evaluation, LLM applications, RAG, prompt engineering, scikit-learn, PyTorch
Tools & Engineering	API integration, REST APIs, Python automation, Git / GitHub, Docker, Jupyter, Pandas, NumPy
Foundations	Statistics, probability, mathematical modeling
Languages	English, Dutch

Experience

AI Engineer & Data Scientist <i>ValueCare</i>	May 2025 – Present <i>Amsterdam, Netherlands</i>
- Build AI-driven SaaS solutions for healthcare organizations, with a focus on practical deployment and product usability. - Analyze large healthcare datasets to support decision-making, identify patterns, and improve operational insight. - Develop predictive models and data workflows using Python, statistics, and machine learning techniques.	
AI Consultant & Developer <i>AI Business Academy</i>	Mar 2023 – Jan 2024 <i>Amsterdam, Netherlands</i>
- Designed and implemented AI solutions for client use cases aimed at process optimization and operational efficiency. - Advised clients on AI adoption, solution design, and the practical application of machine learning in business contexts. - Delivered applied AI work across technical and stakeholder-facing settings, from model development to implementation support.	
Machine Learning Consultant <i>Municipality of Berg en Dal</i>	Jan 2024 <i>Netherlands</i>
- Built machine learning models to forecast public notifications and municipal incidents, including fallen trees and streetlight failures. - Supported more proactive planning by translating historical data into predictive insight for local government use.	

Education

BSc, Artificial Intelligence <i>University of Amsterdam</i>	Jun 2025 <i>Amsterdam, Netherlands</i>
Strong academic foundation in machine learning, statistics, and applied AI.	
Propedeuse, Physiotherapy <i>Amsterdam University of Applied Sciences</i>	Jul 2022 <i>Amsterdam, Netherlands</i>

Additional Experience

Freelance Hospitality Services, J.M.V Services	Feb 2022 – Jun 2024
Restaurant Manager, De Toren Bistro	Jun 2019 – Aug 2021
